

Invited Speaker at LSCM Logistics Summit 2013

The LSCM Logistics Summit held in September 24 2013 aims to promote the adoption of technologies related to the logistics and supply chain industries, to cultivate collaboration between government, industry and technology partners, academia and research representatives, and to showcase the research efforts and innovative technologies of the LSCM R&D Centre. Professor Huang was invited to give a speech on “Towards RFID-Enabled BIM Platform for Prefabrication Housing Production in Hong Kong”.
